Physician Portal

Easy interface for referring physicians to access images 24/7.

eRAD

With eRAD's Physician Portal, referring physicians use an easy interface for 24/7 access to patient results.

Referring physicians can get secure, real-time information on their patients' images with eRAD's Physician Portal. Around-the-clock access can be extended to office staff via proxy privileges, which means immediate updates can be folded into the workflow of the practice. Results are easy to read and navigate. eRAD's Physician Portal helps referring physicians collaborate more effectively with your practice.

FEATURES

▶ **HIPAA-compliant sharing**
Access rules enable the practice to share information while maintaining HIPAA compliance. You control when results are posted.

▶ **Immediate use, anywhere**
Physician Portal requires little or no training and no installation. It works with Windows or Mac browsers and iPads, iPhones, Androids, Blackberry, laptops or workstations.

▶ **Streamlined orders and scheduling**
Skip faxes and paperwork by ordering exams directly in the Physician Portal. You can also schedule appointments on behalf of your patient, or send a patient a prompt with all the information he needs to schedule his own exam.

▶ **Just-in-time marketing**
Brand with your logo to build positive connections. Communicate messages to your referring physicians in the simplest, most direct way.

"We believe that radiology service is best when referring physicians and clinical staff have prompt and easy access to reports. eRAD's web-based system enables our radiology group to read and report 24x7, while making results available to referring physicians easily and quickly."
